“HOOK & BURN DOWN”

CL#9

This month we know you will be busy with friends and family, enjoying the holiday season, so we will be brief.

Drift Control

Roundup O-Max 21.33 oz to the acre

Harmony .30 oz to the acre

Hook 1 Qt. per 100 gal.

10 gallon water

30 acre check plot

If **Hook** could only do drift control it would be worth its value. We sprayed with a 12 mph cross wind using 1 Qt. Per 100 gallon of water and there was a perfect spray pattern, with no 'off target'.

We have used other drift control products and to get control you have to use so high a rate that you will get strings in your water pattern.

Two vineyards were sprayed 10 feet from the row and did not get any 'off target'. We would not have tried that with any other product.

Hook works well for burn down sprayed underneath the vineyard using a small sprayer mixed with Roundup and **Hook**.

From all the 'folks' at Atlantic-Pacific to all of you...we wish you a most

“Merry Christmas” & “Happy New Year”

We wish to thank all, for using and recommending our products

“HOOK” ... “MIC-RO-PAC” ...and “WORKHORSE”

Next year in our 2008 newsletters we will be making recommendations for using **HOOK** with a wide spectrum of pesticides to improve control of that 'bug' or 'weed' that gives growers such 'hair pulling' problems.

If you have a problem that **Hook** helped you solve, finish your eggnog, regular or hi test, and get it to us. The story now, not the eggnog. You might get to see your name in -----er, print.

Seriously, if you have a 'testimonial', someone could benefit from your experience. Pass it along!
